

**Assistant Researcher position  
now available!**

The **Adams Institute Microfabrication Facility** is currently seeking an individual with a bachelor's degree in either Chemistry, Engineering or Physics who is interested in working in the field of microfabrication.

**Job duties include:**

- Fabricating devices for facility clientele
- Training facility users in microfabrication techniques
- Providing light maintenance of the facility, including cleaning and trash removal
- Keeping inventory of supplies and materials
- Providing outreach through scientific conferences, departmental meetings and face-to-face interactions
- Other duties as assigned

**Preferred Qualifications:**

1. Have lab experience obtained by means other than course work
2. Have experience working in a clean room facility
3. Have a working knowledge of microfabrication techniques, including, but not limited to, photolithography, soft lithography and thin film deposition
4. Have experience working with AutoCAD, Inventor, or similar CAD software
5. Have experience designing or maintaining web pages, with a working knowledge of the html language and software such as Dreamweaver, and be familiar with general concepts of good web design

**Pay:** \$17 to \$20 per hour (full-time, up to 40 hours per week)

**Work Schedule:** not defined; flexible

**Work Location:** Multidisciplinary Research Building (West Campus)
