

Ventria Bioscience Inc.

Ventria Bioscience Inc. is a Kansas-based biopharmaceutical company that has developed unrivaled biomanufacturing technologies that enable products that improve the longevity and quality of human life around the world. Our world-class scientists are working on discoveries that will provide billions of people access to the marvels of biomedical innovation through cost effective biomedicines and bioreagents. If you are interested in making a difference in the world, come join our team.

Career Opportunities

Manufacturing Sciences Track

The Manufacturing Sciences Track is designed for those in a science or engineering degree program with an interest in biotechnology manufacturing. Ventria offers multiple entry-level positions in which you will develop valuable hands-on experience directly on our manufacturing floor. From there, your career could lead to manufacturing supervision, operations management, new process development, quality control, or quality assurance positions.

Molecular Biology Track

The Molecular Biology Track is designed for those specializing in the plant sciences, biology or biochemistry and are interested in gene synthesis, biotransformation, plant tissue culture and seed production. Ventria offers entry-level positions in our molecular biology operations department. The initial training program covers the first 6 months of employment in which plant biotechnology methods are taught. Once completed, placement in a position of increasing responsibility in the molecular biology laboratory is possible.

Product Applications Track

The Product Applications Track is a great opportunity for those with a degree in biology, biochemistry, chemistry, biomedical engineering, or a related degree and have an interest in helping customers apply new bioreagents to their cell therapy, vaccine, or cell culture process. Ventria offers multiple entry-level positions entailing a two-year training program that could lead to a Product Application position. Candidates for this track must be willing to relocate to be closer to customers.
