

**University of Kansas
Department of Chemistry
Research Advisory Committee**

When each student chooses a research director they will together decide upon an advisory committee, commonly the faculty with similar research interests, which will ensure that each student pursues his or her graduate education in the most expeditious manner and in line with the student's research interests and career plans. The faculty of the research advisory committee must meet with the student at least once each year to review the student's progress. The results of this meeting must be reported to the Graduate Affairs Administrator and to the student prior to the end of the Spring semester each year.

Please return this form by December 18th.

Research Advisory Committee

Select an appropriate research advisory committee of at least three faculty (including the research director).

A signature from each committee member is required to confirm they have agreed to serve on your committee.
